Phase 1
20 min
Conceptual Introduction
Random vs. grammar-based fuzzing; Fandango syntax
Phase 2
15 min
Live Demo & Setup
Instructor fuzzes a buggy calculator; students install via Drive
Phase 3
45 min
Guided Replication
Students run the code, .fan grammar and .md guide; observe crashes
Phase 4
20 min
Extension & Reflection
Add bugs or write a new program; post-questionnaire
